

Exploring Cancer

Exploring the Role of Biology, Race, Class, and Socioeconomics

Behind cardiovascular disease, cancer is the 2nd leading cause of deaths in the United States. What causes cancer? Why have we not cured cancer yet? What are some of the myths that surround cancer care? Why do people of color seem to develop and die from cancer at rates much higher than the majority of the population?

If you are interested in learning the answers to one or more of these questions, you should consider viewing this engaging and stimulating, webinar series taught by cancer biologists, physicians, public health experts, and other cancer specialists from NCCU, UNC-Chapel Hill, and NC A&T. Each webinar will take place on **Fridays from 11:00 - 11:50 AM**.

Fall 2025 Semester Schedule

Antonio Baines, PhD

Welcome to Cancer(s) and Health Disparities
101 - The Introduction

8/29/25**Clayton Yates, PhD**

Reassessing Tumor Biology through the
Lens of African Ancestry and Health Equity

10/31/25**Valarie Worthy, MSN, RN**

Cancer Survivor Perspective

9/5/25**Angelo Moore, PhD, RN, NE-BC, FAAN**

Health Disparities

11/7/25**Sam Cykert, MD**

ACCURE: A Systemic Approach to Eliminating
Racial Disparities in Cancer Care and
Beyond

9/12/25**Ugwuji N. Maduekwe, MD MMSc MPH**

Precision Medicine and Immunotherapy

11/14/25**Checo Rorie, PhD**

Breast Cancer Health Disparities

10/3/25**Ashley Leak-Bryant, PhD, RN, OCS, FAAN**

Global Oncology

11/21/25**Seronda Robinson, PhD**

Veronica Carlisle, MPH, CHES

Cancer From a Public Health Perspective

10/17/25
